

## Delicious DNA

### Materials:

- Gummy bears (4 colors)
- Sour punch rope
- Toothpicks

### Procedure:

1. Learn the bases of DNA: adenine, red; thymine, yellow; guanine, green; cytosine, orange.
2. Make a model of DNA with the gummy bears and sour straws.
3. Use the sour straws as a phosphate backbone.
4. Don't forget to make your gummy bears "hug" to show the bond between them.

## DNA
